Login/Register Functionality Prototype:

1) If you aren't a registered user and try to log in, it will return a message saying "Error: Wrong username or password."
2) If you want to register, you can put in a username and password and register.
3) Then when you try to log in, it won't return an error. It will instead return a message saying "Login successful!"
4) After you log in, it will automatically bring you to the home page.
